## Histogram of all the columns present in the dataset

## Plotting the at rest blood pressure values

Plotting the cholesterol levels in the sample

Plotting the at rest blood pressure against age
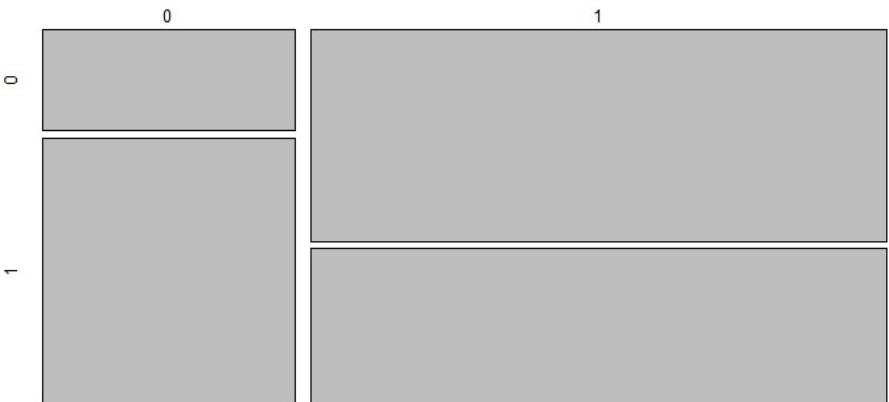

```
        0    1
0   86  226
1  413  300
```
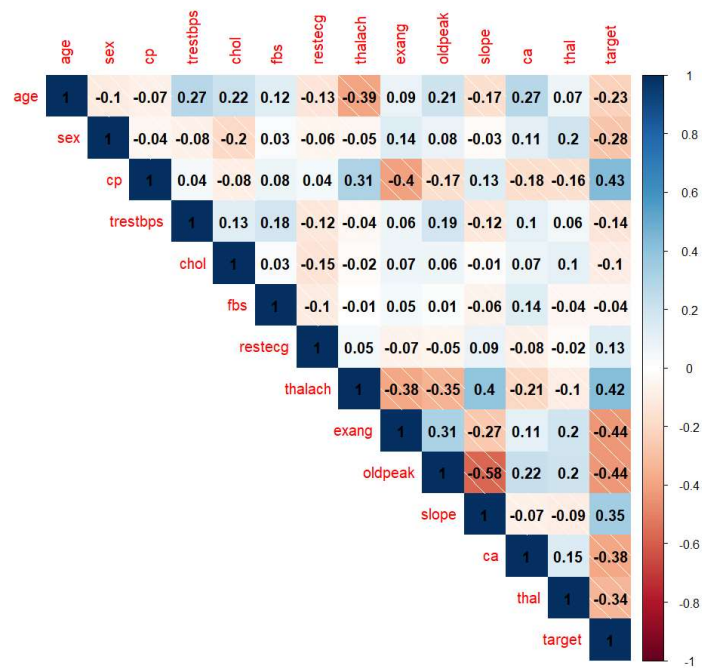

The table givinf the distribution of sex (rows, 0= female, 1 =male) and cardiovascular disease (0 = present, 1 =absent)

Frequency of heart disease with gender

table(data$sex, data$target)

Correlation Plot of the various variables to identify significant ones
